

Wen-Wei Liang, Ph.D.

101 6th Ave, New York, NY
wliang@nygenome.org
(314) 540-1364

Genome engineer and computational biologist aiming to unravel the epigenetic mechanisms governing tumor progression through integrated experimental and computational approaches.

EDUCATION

Washington University in St. Louis	Ph.D. in Molecular Genetics and Genomics	2014–2020
National Yang-Ming University, Taiwan	M.S. in Microbiology and Immunology	2009–2011
National Tsing-Hua University, Taiwan	B.S. in Life Science	2005–2009

EXPERIENCE

New York Genome Center & New York University	New York, NY
Postdoctoral research associate, Laboratory of Neville Sanjana	2021–Present
Washington University in St. Louis	St. Louis, MO
Postdoctoral research associate, Laboratory of Li Ding	2020–2021

PUBLICATIONS

First authorship (* Equal contribution)

RESEARCH PROJECTS

New York Genome Center & New York University

New York, NY

Postdoctoral research associate, Laboratory of Neville Sanjana

2021–Present

- **Transcriptome-scale RNA-targeting CRISPR screens reveal essential lncRNAs in human cells:** Conducted Cas13 pooled screens and perturbation assays, coupled with single-cell RNA sequencing, to identify and characterize hundreds of lncRNAs crucial for cell proliferation and their mechanistic roles.
- **Targeting onco-lncRNAs as a strategy against cancer:** Conducted integrative bioinformatic analyses alongside *in vitro* and *in vivo* pooled screens to identify lncRNAs driving tumor progression in BRCA xenograft and organoid models.

Washington University in St. Louis

St. Louis, MO

Ph.D. student and postdoctoral research associate, Laboratory of Li Ding

2015–2021

- **Epigenetic regulation during cancer transitions across 11 tumour types:** Utilized snATAC sequencing, single-cell RNA sequencing, and bulk whole-exome sequencing data of 206 samples across 11 cancer types from the Human Tumor Atlas Network (HTAN) to profile over a million cells or nuclei. Identified cancer-specific accessible region dynamics correlating with gene expression, uncovering novel regulatory regions and their target genes.
- **Integrative multi-omic cancer profiling reveals DNA methylation patterns associated with therapeutic vulnerability and cell-of-origin:** Leveraged DNA methylation, RNA sequencing, and proteomic data of 687 samples across 7 cancer types from the Clinical Proteogenomic Tumor Analysis Consortium (CPTAC) to elucidate how epigenetic changes in cancer cells influence gene expression, protein levels, tumor characteristics, and therapeutic responses.
- **Driver fusions and their implications in the development and treatment of human cancers:** Conducted comprehensive analysis of gene fusions in over 9,000 tumors across 33 cancer types from The Cancer Genome Atlas (TCGA), uncovering how these fusions drive the expression of oncogenes, tumor suppressor genes, and kinases. Identified druggable fusions in 6.0% of cases, highlighting their potential as targets for precision therapies.

Academia Sinica	Taipei, Taiwan
Master's student and research assistant, Laboratory of Soo-Chen Cheng	2009–2014
<ul style="list-style-type: none"> • A novel mechanism for Prp5 function in prespliceosome formation and proofreading the branch site sequence: Identified the role of Prp5 in spliceosome assembly and branch site proofreading, showing how Prp5's interactions with U2 snRNA and subsequent release facilitate accurate spliceosome assembly. 	
National Tsing-Hua University	Hsinchu, Taiwan
Undergraduate student, Laboratory of Chung-Yu Lan	2008–2009
<ul style="list-style-type: none"> • Investigated the reactions of the iron-responsive element under virulence gene expression in <i>Candida albicans</i>. 	
Linköping University	Linköping, Sweden
Visiting student, Laboratory of Jordi Altimiras	2007–2008
<ul style="list-style-type: none"> • Analyzed G-protein coupled receptor-dependent contractility in chicken heart tissue. 	

SELECTED AND INVITED TALKS

Transcriptome-scale RNA-targeting CRISPR screens reveal essential lncRNAs in human cells	
CSHL Meeting: The Biology of Genomes	Cold Spring Harbor Laboratory, NY, 2024
NYC RNA Symposium	Rockefeller University, NY, 2024
Genome Engineering Seminar Series at Harvard Medical School (Invited)	Virtual, 2024
STATGEN 2025: Conference on Statistics in Genomics and Genetics (Invited)	University of Minnesota, MN, 2025
Multiomic profiling reveals tumorigenic DNA methylation associated with therapeutic vulnerability and cell-of-origin	
The CPTAC Annual Scientific Symposium	Virtual, 2021
The CPTAC Site Visit – NYU-WU-BYU PGDAC	New York University, NY, 2019
A novel mechanism for Prp5 function in prespliceosome formation and proofreading the branch site sequence	
CSHL Meeting: Eukaryotic mRNA Processing	Cold Spring Harbor Laboratory, NY, 2013
Taiwan Yeast Meeting	Taiwan, 2013

FELLOWSHIPS

Taiwan Ministry of Education - Washington University in St. Louis Fellow (\$732,000)	2014–2018
Washington University in St. Louis Precision Medicine Pathway Fellow (\$5,000)	2015–2016
Taiwan Ministry of Education Fellowship (\$10,000)	2007–2008

HONORS & AWARDS

• Outstanding Contribution Award, New York Genome Center	2024
• Best of <i>Cell Reports</i>	2018
• Outstanding Merit Research Award, National Yang-Ming University	2011
• Dean’s List, Department of Life Science, National Tsing-Hua University	2007
• Outstanding student from a low-income background, Lu Feng-Zhang Memorial Scholarship	2006

TEACHING & MENTORING

Simons foundation-NYU biology summer undergraduate research program, New York, NY	
Mentored an underrepresented student on a project focused on identifying long noncoding RNAs essential for macrophage differentiation and polarization using <i>in vitro</i> CRISPR pooled screening.	
• Sebastián H. Díaz-Rodríguez , Undergraduate at University of Puerto Rico-Río Piedras	Summer 2024
Current - Undergraduate, NIH-funded Research Initiative for Scientific Enhancement (RISE) scholar	
Laboratory of Neville Sanjana, New York University, New York, NY	
• Breanna Williams , Master’s student, Recipient of the Wasserman Center Internship Grant	2022–2023
Current - Research technician at Memorial Sloan Kettering Cancer Center	

- **Olivia Choi**, Undergraduate, Recipient of the NYU Dean's Undergraduate Research Fund 2022–2024
Current - Ph.D. student at John Hopkins University

Laboratory of Li Ding, Washington University in St. Louis, St. Louis, MO

- **Carolyn Lou**, Undergraduate 2015–2017
Current - Associate Director at Pfizer Biostatistics
- **Terrence Tsou**, Undergraduate 2017–2019
Current - Medical student at John Hopkins University
- **Rita Jui-Hsien Lu**, Research technician 2019–2020
Current - Senior bioinformatician at Mount Sinai medical school

Department of Biology, Washington University in St. Louis, St. Louis, MO

Spring 2016

Delivered lectures, provided assistance in molecular biology experiments, and assessed student performance as a teaching assistant in the Microbiology Laboratory course (Biol 3491) for over 30 undergraduate students.

SERVICE & OUTREACH

Postdoc Seminar Series, New York Genome Center, New York, NY

2021–Present

Organized and coordinated monthly seminars featuring presentations by postdoctoral researchers.

Café Philo at NY, New York, NY

2024

Delivered a talk introducing the human genome and genome editing to a general audience of over 30 participants.

Biology Club, Rutgers University-Camden, Camden, NJ

2022

Participated as a panelist to discuss career development opportunities in science and technology with over 20 students.

Midwest Taiwanese Biotechnology Association, Chicago, IL

2017–2021

Co-founded the association, served in various leadership roles including Finance (2018), Promotion (2019), and President (2021), and organized events to foster dialogue among more than 300 young scientists across Midwest cities.

Institute of Molecular Biology, Academia Sinica, Taiwan

2014–2018

Served as a panelist to discuss the process of applying for PhD programs in the United States with over 20 undergraduates.
